

Phase 23C Completion Summary

Validation-only phase completed.

Runtime impact: None. No Home, Train, Log, canonical engine, Training Planner logic, planner adapter logic, UI, or seed workout plan behavior was modified.

Files created:

- docs/audits/TRAINING_CLASSIFICATION_AUDIT_V1.md
- src/lib/training-planner-classification-audit.test.ts

Files modified:

- No existing files were modified for Phase 23C.

Key results:

- Seed workouts audited: 84
- Lift Day: 48
- Run Day: 12
- Long Run Day: 12
- Recovery Day: 12
- Current planner disagreements found: 12
- Intentional seed-plan Hybrid Days under Constitution V1: 0

Main finding:

All 12 Wednesday Zone 2 + Mobility + Core workouts should classify as Run Day, but current planner output creates both lift and run blocks because core work is treated as a workout/lift prescription.

Validation results:

- pnpm test: 487 total; 483 passing; 4 failing intentionally as validation findings
- pnpm typecheck: pass
- pnpm lint: pass
- pnpm build: pass

Intentional failing audit tests:

1. classification audit: core-only day is NOT Lift Day
2. classification audit: Zone 2 + Mobility + Core is Run Day
3. classification audit: Hybrid only appears when explicitly allowed
4. classification audit: No seed workout falls back to Hybrid accidentally

Recommended fixes before planner becomes runtime source of truth:

1. Add an explicit day-type classifier that resolves one primary day type before block construction.
2. Treat core as accessory/support work, not as a lift-defining category by itself.
3. Treat mobility as support work, never as a lift-defining category.
4. For zone-2 workouts, classify run as primary and keep core/mobility supportive.
5. Do not create a workout/lift logging target from core support work on run days.
6. Add an explicit conditioning/accessory-conditioning block concept if sprint/finisher work should be displayed separately from both run and lift.
7. Keep Long Run Day protected: no lift block, no accidental hybrid, no extra conditioning beyond prescribed long run.
8. Make Hybrid Day opt-in through plan data or a clear plan rule.
9. Never infer Hybrid from support core/mobility.
10. Preserve run prescription mode exactly: duration stays duration; distance stays distance.
11. Add source-plan metadata for day type, primary stimulus, optional blocks, and explicit hybrid permission.
12. After planner classification logic is fixed, promote these Phase 23C audit tests from failing validation tests to required green regression tests.

Training Classification Audit V1

Phase: 23C
Status: Validation-only audit
Scope: Seed training plan classification against Training Rules Constitution V1
Runtime impact: None -- no Home, Train, Log, planner, adapter, engine, UI, or seed-plan behavior changed by this audit

Executive Summary

- Seed workouts audited: 84
- Lift Day: 48
- Run Day: 12
- Long Run Day: 12
- Recovery Day: 12
- Current planner disagreements found: 12
- Intentional seed-plan Hybrid Days under Constitution V1: 0

Main finding: all 12 Wednesday Zone 2 + Mobility + Core workouts should classify as Run Day, but current planner output creates both 'lift' and 'run' blocks because core work is treated as a workout/lift prescription.

Audit Method

This audit applies 'docs/TRAINING_RULES_CONSTITUTION_V1.md' to every workout currently generated by 'src/lib/seed-data.ts'.

Classification rules applied:

1. Core work alone does not create a Lift Day.
2. Mobility work alone does not create a Lift Day.
3. Mobility + Core is not automatically Hybrid.
4. Run Day remains Run Day even if mobility or core exists.
5. Lift Day remains Lift Day even if warmup and cooldown exist.
6. Long Run Day remains Long Run Day unless explicitly defined otherwise.
7. Hybrid Day requires two meaningful primary stimuli.
8. Sprint work counts as conditioning stress.
9. Long Run + Lift should be flagged.
10. Heavy Lift + Quality Run should be flagged.

Classification Table -- Every Seed Workout

WORKOUT

Week: 1
Day: Monday

Workout Name: Upper Strength + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Upper Strength + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 1

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: MEDIUM

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 1

Day: Wednesday

Workout Name: Zone 2 + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 + Mobility + Core
- Planner run: Zone 2 + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 1

Day: Thursday

Workout Name: Upper Hypertrophy + Density

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: Upper Hypertrophy + Density
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 1

Day: Friday

Workout Name: Athletic Lower / P90X-Style Circuit + Core

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Lower / P90X-Style Circuit + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 1

Day: Saturday

Workout Name: Long Run -- 3 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (3 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 3 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 1

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Monday

Workout Name: Upper Strength + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Upper Strength + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: MEDIUM

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Wednesday

Workout Name: Zone 2 + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 + Mobility + Core
- Planner run: Zone 2 + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 2

Day: Thursday

Workout Name: Upper Hypertrophy + Density

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: Upper Hypertrophy + Density
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Friday

Workout Name: Athletic Lower / P90X-Style Circuit + Core

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Lower / P90X-Style Circuit + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Saturday

Workout Name: Long Run -- 4 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (4 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 4 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 2

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Monday

Workout Name: Upper Strength + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Upper Strength + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: MEDIUM

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Wednesday

Workout Name: Zone 2 + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 + Mobility + Core
- Planner run: Zone 2 + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 3

Day: Thursday

Workout Name: Upper Hypertrophy + Density

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: Upper Hypertrophy + Density
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Friday

Workout Name: Athletic Lower / P90X-Style Circuit + Core

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Lower / P90X-Style Circuit + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Saturday

Workout Name: Long Run -- 5 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (5 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 5 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 3

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Monday

Workout Name: Upper Strength + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Upper Strength + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: MEDIUM

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Wednesday

Workout Name: Zone 2 + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 + Mobility + Core
- Planner run: Zone 2 + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 4

Day: Thursday

Workout Name: Upper Hypertrophy + Density

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: Upper Hypertrophy + Density
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Friday

Workout Name: Athletic Lower / P90X-Style Circuit + Core

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Lower / P90X-Style Circuit + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Saturday

Workout Name: Long Run -- 4 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (4 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 4 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 4

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Monday

Workout Name: Heavy Upper + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 5

Day: Thursday

Workout Name: High-Volume Upper Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Volume Upper Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Friday

Workout Name: Athletic Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Saturday

Workout Name: Long Run -- 6 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (6 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 6 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 5

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Monday

Workout Name: Heavy Upper + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 6

Day: Thursday

Workout Name: High-Volume Upper Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Volume Upper Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Friday

Workout Name: Athletic Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Saturday

Workout Name: Long Run -- 7 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (7 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 7 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 6

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Monday

Workout Name: Heavy Upper + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 7

Day: Thursday

Workout Name: High-Volume Upper Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Volume Upper Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Friday

Workout Name: Athletic Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Saturday

Workout Name: Long Run -- 8 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (8 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 8 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 7

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Monday

Workout Name: Heavy Upper + Sprints + Core

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Sprints + Core
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Tuesday

Workout Name: Lower Strength

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Lower Strength
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 8

Day: Thursday

Workout Name: High-Volume Upper Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Volume Upper Hypertrophy

- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Friday

Workout Name: Athletic Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Saturday

Workout Name: Long Run -- 6 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (6 miles)

Allowed Blocks:

- warmup

- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 6 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 8

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown

- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Monday

Workout Name: Heavy Upper + Explosive Push + Sprints

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Explosive Push + Sprints
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Tuesday

Workout Name: Heavy Lower + Jump Training

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Lower + Jump Training
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core

- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 9

Day: Thursday

Workout Name: High-Density Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Density Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Friday

Workout Name: Athletic Circuit / Kettlebell Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift

- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Circuit / Kettlebell Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Saturday

Workout Name: Long Run -- 9 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (9 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown

- Planner workout: null
- Planner run: Long Run -- 9 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 9

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Monday

Workout Name: Heavy Upper + Explosive Push + Sprints

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup

- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Explosive Push + Sprints
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Tuesday

Workout Name: Heavy Lower + Jump Training

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown

- Planner workout: Heavy Lower + Jump Training
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 10

Day: Thursday

Workout Name: High-Density Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift

- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Density Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Friday

Workout Name: Athletic Circuit / Kettlebell Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Circuit / Kettlebell Conditioning

- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Saturday

Workout Name: Long Run -- 10 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (10 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 10 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 10

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility

- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Monday

Workout Name: Heavy Upper + Explosive Push + Sprints

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown

- Planner workout: Heavy Upper + Explosive Push + Sprints
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Tuesday

Workout Name: Heavy Lower + Jump Training

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Lower + Jump Training
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup

- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 11

Day: Thursday

Workout Name: High-Density Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Density Hypertrophy
- Planner run: null

- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Friday

Workout Name: Athletic Circuit / Kettlebell Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Circuit / Kettlebell Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Saturday

Workout Name: Long Run -- 11 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (11 miles)

Allowed Blocks:

- warmup
- run

- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null
- Planner run: Long Run -- 11 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 11

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null

- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Monday

Workout Name: Heavy Upper + Explosive Push + Sprints

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- conditioning
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Upper + Explosive Push + Sprints
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Tuesday

Workout Name: Heavy Lower + Jump Training

Primary Day Type: Lift Day

Primary Stimulus: Lower strength/power

Allowed Blocks:

- warmup

- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Heavy Lower + Jump Training
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Wednesday

Workout Name: Zone 2 Run + Mobility + Core

Primary Day Type: Run Day

Primary Stimulus: Zone 2 aerobic run

Allowed Blocks:

- warmup
- run
- mobility
- cooldown

Explicitly Forbidden Blocks:

- lift

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: HIGH

Reason:

Run remains primary even with mobility/core support; core does not create lift classification.

Current Planner Output Observed:

- Blocks: warmup, lift, run, mobility, cooldown
- Planner workout: Zone 2 Run + Mobility + Core
- Planner run: Zone 2 Run + Mobility + Core

- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: DISAGREEMENT / MISCLASSIFICATION RISK

WORKOUT

Week: 12

Day: Thursday

Workout Name: High-Density Hypertrophy

Primary Day Type: Lift Day

Primary Stimulus: Upper strength/hypertrophy

Allowed Blocks:

- warmup
- lift
- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: NONE

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, mobility, cooldown
- Planner workout: High-Density Hypertrophy
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Friday

Workout Name: Athletic Circuit / Kettlebell Conditioning

Primary Day Type: Lift Day

Primary Stimulus: Athletic lift/conditioning circuit

Allowed Blocks:

- warmup
- lift
- conditioning

- cooldown

Explicitly Forbidden Blocks:

- long run
- unplanned run

Combined Session: NO

Session Stress: High

Potential Misclassification Risk: LOW

Reason:

Resistance training is primary; sprint/conditioning counts as stress but does not create a run day unless explicitly prescribed as a run.

Current Planner Output Observed:

- Blocks: warmup, lift, cooldown
- Planner workout: Athletic Circuit / Kettlebell Conditioning
- Planner run: null
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Saturday

Workout Name: Long Run -- 8 miles

Primary Day Type: Long Run Day

Primary Stimulus: Long run (8 miles)

Allowed Blocks:

- warmup
- run
- cooldown

Explicitly Forbidden Blocks:

- lift
- sprint
- plyometric
- extra conditioning

Combined Session: NO

Session Stress: Moderate

Potential Misclassification Risk: LOW

Reason:

Long run is protected and remains the primary endurance stimulus.

Current Planner Output Observed:

- Blocks: warmup, run, cooldown
- Planner workout: null

- Planner run: Long Run -- 8 mi
- Planner mobility: null
- Planner recovery: null
- Audit finding: No primary classification disagreement found

WORKOUT

Week: 12

Day: Sunday

Workout Name: Recovery

Primary Day Type: Recovery Day

Primary Stimulus: Recovery / walk / mobility

Allowed Blocks:

- mobility
- recovery

Explicitly Forbidden Blocks:

- lift
- run
- conditioning
- sprint

Combined Session: NO

Session Stress: Recovery

Potential Misclassification Risk: NONE

Reason:

Recovery work is primary; no structured lifting.

Current Planner Output Observed:

- Blocks: warmup, mobility, cooldown
- Planner workout: null
- Planner run: null
- Planner mobility: Mobility
- Planner recovery: null
- Audit finding: No primary classification disagreement found

PLANNER DISAGREEMENTS

Total disagreements: 12

Workout: Zone 2 + Mobility + Core

Week: 1

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 + Mobility + Core

Planner run: Zone 2 + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 + Mobility + Core

Week: 2

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 + Mobility + Core

Planner run: Zone 2 + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 + Mobility + Core

Week: 3

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 + Mobility + Core

Planner run: Zone 2 + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 + Mobility + Core

Week: 4

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 + Mobility + Core

Planner run: Zone 2 + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 5

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 6

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 7

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 8

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 9

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 10

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 11

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Workout: Zone 2 Run + Mobility + Core

Week: 12

Day: Wednesday

Legacy:

Lift + Run / workout plus run-style display risk because current legacy selected-workout paths treat the seed workout as a workout object while run helpers can also derive a run for the same date.

Planner:

Current planner blocks: warmup, lift, run, mobility, cooldown

Planner workout: Zone 2 Run + Mobility + Core

Planner run: Zone 2 Run + Mobility + Core

Expected Under Constitution V1:

Run Day -- Zone 2 aerobic run

Reason:

Core does not create lift classification. Mobility + core does not create a Hybrid Day. Zone 2 remains a Run Day even if mobility/core support work exists.

Seed Plan Classification Summary

- Upper Strength + Sprints + Core -- weeks 1-4: Lift Day; stress High; risk LOW
- Lower Strength -- weeks 1-8: Lift Day; stress Moderate; risk NONE
- Zone 2 + Mobility + Core -- weeks 1-4: Run Day; stress Moderate; risk HIGH
- Upper Hypertrophy + Density -- weeks 1-4: Lift Day; stress Moderate; risk NONE
- Athletic Lower / P90X-Style Circuit + Core -- weeks 1-4: Lift Day; stress High; risk LOW
- Long Run -- 3 miles -- weeks 1: Long Run Day; stress Moderate; risk LOW
- Recovery -- weeks 1-12: Recovery Day; stress Recovery; risk NONE
- Long Run -- 4 miles -- weeks 2, 4: Long Run Day; stress Moderate; risk LOW
- Long Run -- 5 miles -- weeks 3: Long Run Day; stress Moderate; risk LOW
- Heavy Upper + Sprints + Core -- weeks 5-8: Lift Day; stress High; risk LOW
- Zone 2 Run + Mobility + Core -- weeks 5-12: Run Day; stress Moderate; risk HIGH
- High-Volume Upper Hypertrophy -- weeks 5-8: Lift Day; stress Moderate; risk NONE
- Athletic Conditioning -- weeks 5-8: Lift Day; stress High; risk LOW
- Long Run -- 6 miles -- weeks 5, 8: Long Run Day; stress Moderate; risk LOW
- Long Run -- 7 miles -- weeks 6: Long Run Day; stress Moderate; risk LOW
- Long Run -- 8 miles -- weeks 7, 12: Long Run Day; stress Moderate; risk LOW
- Heavy Upper + Explosive Push + Sprints -- weeks 9-12: Lift Day; stress High; risk LOW
- Heavy Lower + Jump Training -- weeks 9-12: Lift Day; stress High; risk NONE
- High-Density Hypertrophy -- weeks 9-12: Lift Day; stress Moderate; risk NONE
- Athletic Circuit / Kettlebell Conditioning -- weeks 9-12: Lift Day; stress High; risk LOW
- Long Run -- 9 miles -- weeks 9: Long Run Day; stress High; risk LOW
- Long Run -- 10 miles -- weeks 10: Long Run Day; stress High; risk LOW
- Long Run -- 11 miles -- weeks 11: Long Run Day; stress High; risk LOW

Recommended Fixes Before Planner Becomes Runtime Source of Truth

1. Add an explicit day-type classifier that resolves one primary day type before block construction.
2. Treat 'core' as accessory/support work, not as a lift-defining category by itself.
3. Treat 'mobility' as mobility/support work, never as a lift-defining category.
4. For 'zone-2' workouts, classify run as primary and keep core/mobility supportive; do not create a workout/lift logging target from core support.
5. Add an explicit 'conditioning' or 'accessoryConditioning' block concept if sprint/finisher work should be displayed separately from both run and lift.
6. Keep Long Run Day protected: no lift block, no accidental hybrid, no extra conditioning beyond prescribed long run.
7. Make Hybrid Day opt-in through plan data or a clear plan rule; never infer Hybrid from support core/mobility.
8. Preserve run prescription mode exactly: duration stays duration, distance stays distance.
9. Add source-plan metadata for day type, primary stimulus, optional blocks, and explicit hybrid permission before importing future PDFs.
10. Promote the Phase 23C tests from audit-only failing validation to required green tests only after planner classification logic is updated.

Validation Notes

- Baseline before adding Phase 23C tests: 'pnpm test' reported 475 tests, 475 pass.
- After adding Phase 23C audit tests: 'pnpm test' reported 487 tests, 483 pass, 4 fail.
- The failures are intentional validation findings for this audit phase; no planner/runtime fixes were made.
- Failing areas: core-only classification, Zone 2 + Mobility + Core classification, and accidental hybrid detection across all Wednesday Zone 2 seed workouts.

Audit Boundary Verification

Created by this phase:

- 'docs/audits/TRAINING_CLASSIFICATION_AUDIT_V1.md'
- 'src/lib/training-planner-classification-audit.test.ts'

Not changed by this phase:

- Home runtime behavior
- Train runtime behavior
- Log runtime behavior
- Canonical engines
- Training Planner logic
- Training Planner adapter logic
- Seed workout plans
